Name _____ Date of Birth _____ Pack _____
Address _____ City/State _____ Phone _____
Name of Parent _____ Cell phone _____ Work _____

Cub Scout Day Camp Medication Policy

If your child is an insulin dependent diabetic or a severe asthmatic, please bring a letter from the child's doctor with his "sick plan" to be given to the camp nurse on the first day.

All medications to be given during camp hours will be kept in the Health Lodge and administered by the camp nurse. Any exceptions (severe asthmatics, diabetics, etc) must be accompanied by a letter from the doctor.

Medications must be in their original containers with the dispensing label intact.

Tips to Avoid Common Camp Ailments

The most common health problems at camp are mild dehydration, insect bites, scrapes and scratches, sunburns, and heat issues. You can prevent some of these issues by feeding your son a good breakfast, having him get plenty of sleep, packing a nutritious lunch, sending a good sized bottle of water and applying sunscreen. Camp is a busy, active and fun place.

Permission for Over the Counter Medications

I authorize the camp nurse to administer:		Yes	No	Call First	Parent Initial
For scrapes and Scratches	Antibiotic ointment	___	___	_____	_____
